Jo,

I appreciate your assistance here. It might help to know that these notices are not required or expected to be a complete report of everything said in the presentation. The practice in the communications bar is to cover the main points, while making these as brief as the rules allow.

That being said, I have no problem with your added paragraph, and thanks for the correction regarding ERM.

Any other comments from anyone else?

John

John, I have made changes in two areas (using track changes), and submit this for your and the groups' review. I do not believe that ERM is a member of ACRA, and have deleted that. I have added a paragraph related to the intense discussion on the different kinds of

eligibility.

Hello everyone,

Attached for your review is a draft ex parte notice from our conference call last Friday
with the TWG Drafting Committee.

Please get me your comments as soon as you can. We will need to file this with the FCC
today.

Thanks,

John
